 <p>Internet</p> <h3>Rural Arizona Students Ride Busses Equipped with Free Wi-Fi</h3> <p>Shirley Hufschut (Bris) • May 19, 2010 10:36 AM</p> <p>16 comment(s) • last by cern... on May 19 at 3:48 PM</p> <p>Print ShareThis New</p> <p>Kids access web on school provided laptops</p> <p>Most people can remember what it was like to ride on a school bus to and from school. Those bus trips were often filled with fights, spit wads, and other things that many would like to forget. Thankfully, most bus rides for students are only over short distances, but some that live in rural communities are on the bus for a long time.</p> <p>One such school district is the Vail School district in southern Arizona. The district covers 400 square miles of rural communities and some students are on the bus for over two and a half hours each day. Those hours spent commuting were downtime for students much like hours spent on airlines or trains until recent times. With the advent of in-flight internet access like Gogo and Airtrak, some of the trains for web access, downtime can now be productive.</p>  <p>Wi-Fi Router in School bus (Source: NPR)</p>
