

臺北市鄰里交通環境改善計畫

Taipei City Neighborhood Traffic Environment Improvement Program

The origin of this plan is “Ten illegal parking hot spots reported by people”. In order to establish a safe pedestrian surrounding, control reasonable parking, maintain enough space for disaster relief, and set up a barrier-free environment in the community, Taipei city government started to implement “Neighborhood Traffic Environment Improvement Program” since August 31, 2015.

The planning for 456 villages in Taipei City was completed in 2019, and construction will be completed in 2020. In the future, we will strengthen communication with residents, increase the villages of completion over 80%, and maintain improved neighborhood traffic environments.
